

Fusion Products

Blended Products

No two businesses are alike – so why should your energy supplier force you to choose a cookie-cutter product? By combining fixed, heat rate, and variable energy options, you get the best of both worlds: price and security. TriEagle's Fusion suite of products combines the benefits of the various energy products in the same manner a mutual fund spreads risk across multiple financial instruments. Typically for larger commercial and industrial customers, TriEagle Fusion products can be combined in different percentages to match your risk profile.

Fusion FV – combination of fixed and variable-rate pricing, in percentages, blocks, or shaped blocks

Fusion FHR – previously known as the TriEagle Partner Plan, this is a combination of fixed and variable monthly components

Fusion HRV – combination of heat rate and variable-rate pricing, in percentages, blocks, or shaped blocks

Product	Fixed	RTE	Heat Rate
Fusion FV	✓✓✓	✓✓✓	
Fusion FHR	✓✓✓		✓✓✓
Fusion HRV		✓✓✓	✓✓✓
