FOR IMMEDIATE RELEASE

TriEagle Celebrates 10 Years

The Woodlands, Texas – February 12, 2013 – Recently, TriEagle Energy, LP marked the 10th Anniversary of PUCT Certification Number 10064, launching the start of its retail electric business. Company founders reminisced about TriEagle’s exciting past and look to a bright future.

“It’s fun to look back at the days of the three of us in one room with giant sticky notes on the walls, trying to figure out how the heck this Texas deregulated electric market worked”, said COO Robert Case. He added, “I still remember our first customer, first bill and, most importantly, the first payment.”

“When we started in 2003, there were dozens of REPs in Texas. As far as we know, we are the only one of those still in business with our original management team. We are really proud of that,” said CEO Daniel Cook. “TriEagle has seen tremendous growth over the last few years, as we’ve expanded our products and service areas. As we look to 2013 and beyond, we are thrilled about the additional opportunities the US energy market presents.”

TriEagle currently serves business and residential customers in Texas and Pennsylvania, with additional markets opening soon in 2013. Last year, TriEagle and Pacific Summit Energy (Sumitomo) announced a long term supply and credit support agreement, starting the next chapter of the continuing 10 year success story.

About TriEagle Energy: TriEagle Energy (www.trieagleenergy.com) approaches the electric marketplace with a strong commitment to customer focus and excellence and has served commercial, industrial and residential customers since 2003. Providing value through energy cost savings and taking a long-term view of the marketplace, TriEagle uniquely provides customized solutions and products.
